Please see below. Should they be directed to FEMA?

Subject: Montgomery County Community need

Gloria,

As follow up from our conversation, the Montgomery County Judge Craig Doyal and the expressed the urgent need for trucks to pick up debris from the community. It has been 9 days since debris has been picked up in their county. The trucks needed are ones with grapple hooks or trucks and backhoes with the ability to pick up debris from piles and load the trucks. Trash trucks will not work as the debris is larger than what will fit in a trash can. Judge Doyal is concerned the hurricane in the gulf will come up and the debris will be washed into the surrounding rivers and create a larger cleanup operation in the future than is currently needed. Darren Hess, the director of the County EOM office, has stated that he is having trouble getting a contract in place due to their rates being lower than other counties.

Thank you,

Katy
